##### Directions for Use:

###### Paper Handling:

- Avoid touching the coated surface of the paper before and after printing, and wear cotton gloves if necessary.
- Avoid exposure to high temperatures, high levels of humidity and moisture. These factors can affect the drying time of some Olmec™ products.

###### Paper Storage:

- Remove prints from the tray after printing; do not allow them to be stacked.
- Prints should be allowed to dry in air, preferably left uncovered for 24 hours to allow the residual liquid from the inks to evaporate.
- In cases where stacking is unavoidable, a paper inter leaf should be placed between each print.

###### Conditions of Use:

- Where possible, all paper should be stored and used within the following range of environmental conditions:  
Temperature = 10°- 35°Centigrade  
Relative Humidity = 30% - 80%
- Unused paper should be stored in its original packaging, out of direct sunlight under normal climatic conditions.

Olmec™ papers are manufactured and distributed by Innova Art. All recommendations and product indications are for your guidance, and are subject to our test criteria.
